EXPERIENCE

Analytics Vidhya

Jul 2025 - Present

Software Development Engineer 1

Gurugram, India

- Architected a **multi-tenant Django REST Framework** backend for **Mentornaut**, an AI learning platform with **45+ REST APIs** serving **5,700+** learners across enterprise and consumer tiers; a **Redis-cached routing middleware** resolves each request's tier so one change ships everywhere.
- Built a **LangChain/LangGraph** agentic **RAG** pipeline integrating **5 external AI agent** services, routing **13,100+** responses across **20+** classified intents over **31.5M** LLM tokens with **OpenAI/Anthropic/Gemini** fallbacks and **Qdrant** vector retrieval.
- Shipped an **AI assessment engine** and nightly **Celery** summarization pipeline generating **905** MCQs and **5,800+** AI summaries; added **stuck-job recovery**, leaving **0 of 92** attempts stranded in grading.
- Built a **Kafka** consumer (**Avro** + Schema Registry) ingesting course-enrollment events into **PostgreSQL** with **Redis**-buffered batching, and automated **25+ Celery Beat** jobs with **Sentry** and **MS Teams** alerting.

Analytics Vidhya

Jan 2025 - Jun 2025

SDE Intern

Gurugram, India

- Migrated **Free Courses** system from file-based storage to **PostgreSQL** database, building **Django REST** backend with **JSON schema validation**, enabling 2 teams to manage **120+ courses** dynamically without **GitLab** commits, reducing deployment time from hours to minutes.
- Rebuilt **Brahma**, a user activity tracking system from Django to FastAPI with **token-based authentication**, capturing **50,000+** monthly behavioral events with **95%** accuracy using **GeoIP2** for geolocation and **AWS Kinesis-S3** pipeline for **async** event storage.
- Eliminated cross-service data synchronization issues between **NewCompetition** and **QuizMania** by implementing **PostgreSQL Foreign Data Wrapper** for real-time user data access via the **API Gateway**, removing data duplication.

SKILLS

- Languages:** Python, C++, Java, SQL
- Frameworks:** Django, Django REST Framework, FastAPI, Celery, SQLAlchemy, GraphQL, Django Channels
- Databases:** PostgreSQL, MySQL, Redis, Qdrant, pgvector
- AI/ML:** RAG Systems, LangChain, LangGraph, OpenAI, Anthropic Claude, Google Gemini, Langfuse
- Cloud & DevOps:** AWS (S3, Kinesis), Docker, Kafka, Git, GitLab, Jenkins, CI/CD, Sentry
- Tools & Libraries:** Postman, Grafana, Metabase, JWT, Unicorn, Whitenoise, GeoIP2, Pydantic

PROJECTS

[Code-Query](#) | Python, FastAPI, LangChain, PostgreSQL, Gemini AI, Docker

Jun 2026

- Engineered a **Retrieval-Augmented Generation** application enabling developers to query GitHub repositories in natural language, chunking source files into **768-dimension** vector embeddings for **semantic search**.
- Architected an **asynchronous** ingestion pipeline using **FastAPI** and **SQLModel** generating embeddings via Gemini **text-embedding-004**, stored in **PostgreSQL** with **pgvector** for **cosine** similarity search; **Dockerized** with **JWT** auth.

[HireHub](#) | Django REST Framework, React.js, PostgreSQL, Zustand, Tailwind

Jan 2026

- Built a job platform with **Role-Based Access Control** (Admin, Staff, Candidate) across **10+ Django REST Framework** APIs and a **React.js** frontend (**React Router v7**, **Zustand**, **Tailwind CSS**).
- Architected a normalized **PostgreSQL** schema with **User-Job mapping** tables to track application statuses (Applied, Bookmarked, Clicked), implementing **django-filter** for search across title, company, location, and tags.

EDUCATION

National Institute of Technology Patna

May 2025

Bachelor of Technology in Electronics and Communication Engineering

CGPA - 8.04

CODING PROFILES & ACHIEVEMENTS

- Achieved a rank of **108 out of 26,446** in the **CodeChef Starter 115** contest. [Link](#)
- Secured a rank of **1391 out of 22,688** participants in the **Leetcode Weekly 383**. [Link](#)
- Ranked **3,224 among 30,822** participants in **Hello 2024** contest on **Codeforces**. [Link](#)
- CodeChef 4 Star** (Max 1818) | **LeetCode Knight** (Max 1856) | **GeeksForGeeks 600+** problems solved.
